| <b>Employee Churn Prediction</b>   <i>Python, Google BigQuery, PyCaret, Looker Studio</i>                                                                                                                                                                                                                                                                                                                                                                          | Oct 2024 |
| <ul style="list-style-type: none"><li>Engineered a predictive churn model using Random Forest, achieving 0.97 F1-score and 0.99 AUC, by applying PyCaret AutoML in Google Colab with data sourced from BigQuery.</li><li>Designed and deployed an interactive Looker Studio dashboard that visualized churn risk across departments, uncovered key drivers (job satisfaction, tenure, workload), and empowered HR with data-driven retention strategies.</li></ul> |          |
| <b>Behrouz-Biryani Analysis</b>   <i>Python, BeautifulSoup, MS Excel</i>                                                                                                                                                                                                                                                                                                                                                                                           | Sep 2024 |
| <ul style="list-style-type: none"><li>Extracted, standardized, and validated 30+ product attributes from the website using Python (BeautifulSoup), ensuring data accuracy across large datasets.</li><li>Cleaned and analyzed data in MS Excel using pivot tables, Power Query, and advanced formulas and designed performance overview and customer demographics dashboards in MS Excel, applying creativity for user-friendly visuals.</li></ul>                 |          |

## TECHNICAL SKILLS

**Languages:** Python, C++, SQL, HTML/CSS, R  
**Tools:** Snowflake, Apache Airflow, MS SQL Server, Power BI, MS Excel, Jupyter Notebook, VS Code, Microsoft Office, Google Looker Studio  
**Libraries/Frameworks:** Pandas, NumPy, Matplotlib, BeautifulSoup, Scikit-Learn, Google BigQuery  
**Core Subjects:** DBMS, Operating Systems, Object Oriented Programming

## CERTIFICATIONS AND ACHIEVEMENTS

**IIT Bombay:** Python Training, C Training, C++ Training  
**Coding Platforms:** Solving problems 50+ and 100+ days in 2025(LeetCode), SQL Silver Badge(Hackerrank)  
**Infosys Springboard:** DBMS, Entity-Relationship (ER) Modelling, Business Intelligence and Multidimensional Data Modelling, Hands-on Data Visualization, Technical Data Analytics  
**Cloud Platforms:** Oracle Cloud Infrastructure 2025 Generative AI Professional (1Z0-1127-25)
